HOBBIES AND INTERESTS

My major hobby is sport. I currently play Gaelic Football for school and club, while playing this I have developed many relationships with people from other clubs, counties and sports. However, from a young age I've had a huge interest in technology and computers. As I've got older this interest kept developing persuading me to follow a career in IT as well as my interest in technology. I have kept up to date on the new technology releases from headphones to mobile phones. I have a keen interest in photography and videography. This gives me a form of expression that I previously didn't have and it has allowed me to achieve many different things which I was unable to achieve before. It has also given me different opportunities that I previously wouldn't have achieved. Combining these, it has given me the ability to be driven to achieve many things together with a team and individually. I have a huge interest in technology especially computers where I learned a lot of what I know today. With this interest I have achieved some of my personal goals which include building my own computer and the network in my house.
